Children's Geographies

Advancing interdisciplinary understanding of younger people's lives

Editor: Hugh Matthews, University of Northampton, UK

Volume 10, 4 issues per year
Print ISSN: 1473-3285, Online ISSN: 1473-3277

Children's Geographies is a peer-reviewed journal that provides an international forum to discuss issues that impact upon the geographical worlds of children and young people under the age of 25 and of their families. The journal aims to be accessible to new researchers, including postgraduate students and academics at an early stage of their research careers, and to practitioners with an interest in children, youth and families. Study of the geographies of this kind, whilst emphasising the importance of place, space and spatiality, inevitably cuts across inter- and intra-disciplinary boundaries.

The journal provides a forum for academics and practitioners with an interest in these multifaceted geographies, enabling new insights into the diverse and multiple realities of young people's lives.

China Journal of Social Work

Editors in Chief: James Kin-Ching Lee, The Hong Kong Polytechnic University, HKSAR, PRC and Sibin WANG, Peking University, PRC

Volume 5, 3 issues per year
Print ISSN: 1752-5098, Online ISSN: 1752-5101

Social work as an academic discipline was reintroduced to universities in the Chinese Mainland in the 1980s. The number of universities offering social work programs has increased drastically in the past two decades. Social services provided by government organizations and NGOs have also proliferated as a response to rising social problems and needs.

China Journal of Social Work is the first academic English journal jointly edited from Hong Kong and mainland China, to focus on social work development taking place in China. The journal endeavours to provide a platform for scholars within and outside mainland China to share research, teaching and practice experiences and to facilitate critical dialogue between Chinese social workers and their international peers.

Volume 15, 8 issues per year

Print ISSN: 1367-6261, Online ISSN: 1469-9680

Journal of Youth Studies is an international scholarly journal devoted to a theoretical and empirical understanding of young people's experiences and life contexts. Over the last decade, changing socio-economic circumstances have had important implications for young people: new opportunities have been created, but the risks of marginalisation and exclusion have also become significant. This is the background against which *Journal of Youth Studies* was launched, with the aim of becoming the key multidisciplinary journal for academics with interests relating to youth and adolescence.

Mental Health & Substance Use

Editor-in-Chief: David B. Cooper, *West Sussex, UK*

Volume 5, 4 issues per year

Print ISSN: 1752-3281, Online ISSN: 1752-3273

Increased recognition of co-existing mental health and substance use issues over the past 20 years has led to a growing body of discussion and research into the efficacy of interventions, treatment, and service delivery. As knowledge and expertise advance, professionals at the forefront of the field need an effective and stimulating forum in which to share information, review strategies, and develop new concepts.

This international and interdisciplinary journal provides a single authoritative source of reference for clinicians, managers, service developers, researchers, educators, trainers, and students. The journal's primary aim is to explore the complex issues arising from co-existing mental health and substance use.

KEY SOCIAL WORK BOOKS FROM ROUTLEDGE

Ethical Issues in Youth Work

2nd Edition

Edited by Sarah Banks

This fully updated new edition of *Ethical Issues in Youth Work* presents a comprehensive overview and discussion of a range of ethical challenges facing youth workers in their everyday practice.

The first part offers a clear outline of the nature of professional ethics, relevant ethical theories and an overview of the policy and organisational context of youth work. The second part is grounded firmly in practice, with experts in the field exploring specific issues that raise ethical difficulties for youth workers, such as when to breach confidentiality; information sharing in inter-professional contexts; the ethics of youth participation and active citizenship and more.

Ethical Issues in Youth Work offers a timely and unique insight into both the dilemmas of youth work practice and some of the more recent challenges faced by youth workers and all those working with young people in the light of current public attitudes and government policies towards young people.

Mental Health and Social Problems

A Social Work Perspective

Edited by Nina Rovinelli Heller and Alex Gitterman

Mental Health and Social Problems is a textbook for social work students and practitioners. It explores the complicated relationship between mental conditions and societal issues as well as examining risk and protective factors for the prevalence, course, adaptation to and recovery from mental illness.

The introductory chapter presents bio-psycho-social and life-modeled approaches to helping individuals and families with mental illness. The book is divided into two parts. Part 1 addresses

specific social problems, such as poverty, oppression, racism, war, violence, and homelessness, identifying the factors which contribute to vulnerabilities and risks for the development of mental health problems, including the barriers to accessing quality services. Part 2 presents the most current empirical findings and practice knowledge about prevalence, diagnosis, assessment, and intervention options for a range of common mental health problems – including personality conditions, eating conditions and affective conditions.

Professional Development in Social Work

Complex Issues in Practice

Edited by Janet Seden, Sarah Matthews, Mick McCormick and Alun Morgan

Social work practice in the twenty-first century is continually changing. Contemporary practitioners work in complex areas and have to do so quickly and competently. This text helps qualified social workers, as well as those about to qualify, to build on their initial studies in order to develop professionally.

The volume considers not just what you need to know to practice, but how you develop in criticality and capability – in particular, how you can respond effectively in times of uncertainty and change to become more effective. It examines new roles, identities and contexts, including some international perspectives and the impact of globalisation. Each chapter discusses the contexts of practice (such as law, policies and theories); the contributions made both by those who practice social work and those who use its services; and the capabilities and skills that social workers need to develop in order to deal with complexity in social work.

Student Social Work Series

Human Growth and Development

An Introduction for Social Workers

By John Sudbery

Social workers work with people at all stages of life, tackling a multitude of personal, social, health, welfare, legal and educational issues. As a result, all social work students need to understand human growth and development throughout the lifespan.

This introductory text provides a knowledge base about human development from conception to death. It is

designed to encourage understanding of a wide range of experiences, including some very difficult ones, such as child abuse, the developmental trajectories of children in care, mental distress, the experience of people with dementia, the experience of torture victims and untimely bereavements. Using engaging narratives to illustrate real-life situations, the author analyses them to demonstrate the link between theory, and different theoretical approaches, and practice.

Packed with case studies, this student-friendly book includes overviews, summaries, questions and further reading in each chapter as well as a more formal academic section designed to challenge and intrigue students. A reference section contains a glossary and overviews of the principal theories discussed throughout the book.

Social Work

A Reader

Edited by Vivienne E. Cree

This inspiring *Reader* brings together some of the most significant ideas which have informed social work practice over the last forty years.

Exploring these fundamental ideas, the book includes commentaries that allow the reader to understand the texts on their own terms as well as to be aware of their relations to each other and to the wider social work context.

An accessible introduction contextualises the reader, summarising the main themes and highlighting key issues. The book is then divided into three main sections, each presenting key texts which have contributed to the development of the profession of social work; social work knowledge and values; and social work skills and practice.

The contributions are drawn from a wide range of perspectives: psychological, sociological, philosophical, educational and political, as well as perspectives which are grounded in the experiences of practitioners and those who use services.
