

Applicable Analysis An International Journal

Special Issue dedicated to
Professor Dr. Vsevolod Alekseevich Solonnikov
on the occasion of his 75th birthday

CONTENT:

On nonlinear stability of linear pinch
Mariarosaria Padula

On the maximum modulus theorem for the steady-state Navier-Stokes equations in Lipschitz bounded domains
Remigio Russo

Micro-macro simulations of a shear-thinning viscoelastic kinetic model: application to blood flow
Adélia Sequeira and Keith D. Smith

Hopf bifurcation for two-dimensional double-diffusive convection
Jerry L. Bona, Chun-Hsiung Hsia, Tian Ma and Shouhong Wang

A note on the uniqueness of bounded very weak solutions to the Navier-Stokes Cauchy problem
Paolo Maremonti

On the long-time behavior of a rigid body immersed in a viscous fluid
Eduard Feireisl and Šárka Nečasová

Cauchy convergence schemes for some nonlinear partial differential equations
Nathan Glatt-Holtz and Roger Temam

An L^2 -maximal regularity result for the evolutionary Stokes-Fourier system
Miroslav Bulíček, Petr Kaplický and Josef Málek

Weak L^2 -solutions to a Stokes-like system of fourth order in bounded Lipschitz domains
Christian Simader

Hölder-continuous Young measure solutions to coercive non-monotone parabolic systems in two space dimensions
Jens Frehse and Maria Specovius-Neugebauer

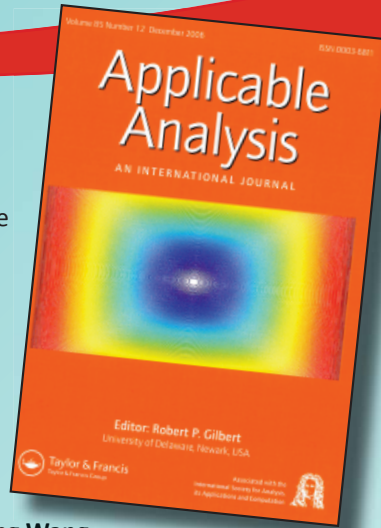

Perturbation of essential spectra of exterior elliptic problems
Gerd Grubb

Global analysis of a stage-structured model with population diffusion
Giuseppe Mulone and Wendi Wang

A weak solvability to the steady Navier-Stokes equations for compressible fluid
Olivier Muzereau, Jiří Neustupa and Patrick Penel

Necessary and sufficient conditions on local strong solvability of the Navier-Stokes system
Reinhard Farwig, Hermann Sohr and Werner Varnhorn

Report on free surface problems for the Navier-Stokes equations with surface tension
Yoshihiro Shibata and Senjo Shimizu

Editors:

Šárka Nečasová, *Czech Academy of Sciences, Prague, Czech Republic*

Reimund Rautmann, *University of Paderborn, Germany*

Roger Temam, *Indiana University, Bloomington, Indiana, USA*

Werner Varnhorn, *University of Kassel, Germany*

A Shared Vision for Your Research

Applicable Analysis is concerned primarily with analysis that has application to scientific and engineering problems. Papers should indicate clearly an application of the mathematics involved. On the other hand, papers that are primarily concerned with modeling rather than analysis are outside the scope of the journal.
